

The gold standard in digital court recording.

For The Record's flagship suite of software **tools for capturing and managing the court record** sets the digital court-recording industry standard.

The latest version of FTR Recording Suite continues to expand these industry-leading capabilities, now providing courts with a **livestream functionality** and **improved live listening**.

Already equipped with AV innovations for **premium quality audio and video**—with up to 16 channels of high-fidelity audio and 4 channels of HD video—FTR Recording Suite has new features that specifically **support court monitors and court reporters working remotely**.

FTR Recording Suite enables courts to directly **stream the court recording to FTR Player** within FTR Gold Monitoring Suite 7.6 and make the **recording available—in real time—to any authorized user** on the court network. Reduced delay and loading time within FTR Player make for a **reliable live-listening experience**, even during poor network connectivity.

With HD **video recording from more non-IP video sources**, **reduced bandwidth** required, and **advanced storage and security features**, FTR Gold Recording Suite is the comprehensive solution for courts committed to meeting demand beyond their traditional four walls.

Inclusions:

FTR Reporter, Manager, and Player

Key Features.

- ✓ Direct livestream (within the court network) of audio and video in a WAN, VPN, or VDI environment
- ✓ Livestream improves live listening and monitoring confidence for remote users
- ✓ 16 high-fidelity audio channels—the number considered optimal for isolating voices for cost-effective, fast, accurate transcription
- ✓ Multichannel HD video enhances recordings from non-IP video sources (e.g., webcams or USB cameras)
- ✓ Adjustable frame rate and upgraded codec for non-IP video sources increases video capacity
- ✓ Background buffering/caching improves playback during poor network connectivity
- ✓ Blackmagic DeckLink PCIe and Mini Recorder cards are supported
- ✓ Group policy to easily manage access to recordings
- ✓ For The Record Select Certificate app digitally certifies recordings to increase security
- ✓ Improved installer simplifies upgrades by retaining configuration settings—such as admin, audio, and video—from currently installed Recording Suite
- ✓ Searchable, time-stamped Log Notes finds information such as appearances, spellings, and key terminology
- ✓ Advanced management of court recordings with secure storage and access settings in line with department and jurisdiction policies

Recommended system specifications.

Windows® 10 or Windows ® 11

Intel Core i5 (any generation CPU)

8GB RAM

150MB of available storage

Separate partition recommended for audio recordings

On-board soundcard

For The Record-compatible multichannel audio capture device

For The Record-compatible video capture device

Compatible optical drive—if archiving to optical media

Network connection—if archiving to network
