

Groundbreaking technology transforming court record access.

For The Record created the industry standard in court recording solutions in the courtroom—and we are now **elevating the standard** in the cloud.

For The Record’s Cloud Platform combines three solutions revolutionizing the way audio and video records are utilized by judges, court IT, administrators, court reporters, and the public.

Recording Vault, Transcript Express, and Speech-to-Text integrate or work as standalone solutions to securely store, efficiently manage, and deliver access to court recordings and transcripts.

Cloud Platform Solutions.

Recording Vault.

Court recording storage, management, and access

Recording Vault simultaneously replicates digital court recordings into the cloud as soon as they are captured; guards them with industry leading security measures; yet still makes them instantly and easily available to judges and court staff.

Transcript Express.

Transcript management and ordering

As the world's first and only fully automated system for managing, ordering, delivering, and archiving transcripts, Transcript Express has recast and reformed outdated delivery of court recordings and transcripts.

Speech-to-Text.

The power of sound and text together

Created specifically for the justice system, FTR Speech-to-Text syncs a rough draft of up to 95 percent accuracy with time-stamped audio/video recordings—quickly unlocking insights for deeper understanding.

Building on market-leading, in-courtroom technologies, For The Record is leveraging groundbreaking cloud solutions to help administer justice more effectively and efficiently.

Think speed, accuracy, security, and efficiency like never experienced before.
