

Unrivalled storage and access for official court content.

Forming the foundation of FTR Justice Cloud, FTR Recording Vault exponentially increases the ease and security of managing official court content.

It provides automatic, secure, cloud-based storage and a comprehensive, centralized management platform—enabling immediate access for the court.

FTR Recording Vault automatically replicates digital court recordings in the cloud as they are captured. It guards records with industry-leading security measures, yet still makes them instantly available to judges, court staff, and other approved participants.

Powered by **FTR Justice Cloud**, FTR Recording Vault is enhanced functionality for justice administration.

Key Features.

- ✓ All recording files (FTR Gold V1.1 to latest generation 4-channel HD video and 16-channel audio; plus files captured by real-time recorders) are automatically stored and managed centrally via automatic cloud replication
- ✓ Courts can manage user permissions and access
- ✓ Comprehensive auditing capabilities to monitor usage and retrieval of recordings—see who accessed records, when, and on which device
- ✓ Cloud-based storage and digital checksums provide security protection from physical and cyber threats
- ✓ Playback of the court recording enhanced with a visual wave form
- ✓ Audio synced with speech-to-text rough drafts delivered by FTR QuickDraft enable efficient playback of the court record and enhance the searchability of audio
- ✓ FTR Desktop App supports transcribers and court reporters, facilitating efficient transcription

For The Record Cloud Ecosystem.
