Cloud technology with transformative functionality for courts—access, store, and manage official content.

FTR Justice Cloud—an online platform—revolutionizes court records access, management, and use for all stakeholders—from judges, attorneys, and court reporters to administrators, journalists, and the public.

Leveraging four key functionalities, FTR Justice Cloud:

✅ Securely stores official court content and enables access to approved participants

✅ Bridges the gap between audio capture and certified transcript production via speech-to-text processing, while increasing the accessibility and searchability of official court recordings

✅ Enhances court operations by enabling immediate access, review, playback, and collaboration via a searchable, digital record, ultimately delivering invaluable insights into each court proceeding

✅ Efficiently manages and distributes requests for official court content, including audio/video recordings, certified transcripts, and speech-to-text rough drafts

FTR Recording Vault.

Unrivaled storage and access for official court content.

As digital court recordings are captured, FTR Recording Vault simultaneously replicates them into the cloud, protects records with industry-leading security measures, and makes them instantly and easily accessible to authorized personnel.

FTR Express Access.

Official court content management and ordering

Streamlines and simplifies the typically time-consuming process of locating, managing, ordering, distributing, and archiving official court content, such as audio/video recordings and transcripts.

FTR QuickDraft.

The power of audio and text together

Boosts the usability of FTR Gold recordings stored in FTR Recording Vault by syncing speech-to-text rough drafts, improving the accessibility and searchability of court recordings.

FTR RealTime.

Leverage the advantages of a searchable, digital record of legal proceedings in real time

FTR RealTime offers inclusive, instant access in the courtroom and beyond; processes languages and legal terminology; attributes simultaneous speech correctly; and provides actionable insights through the review of linked text, audio, and video.

For The Record Cloud Ecosystem.
