The gold standard in digital court recording, monitoring, management, and play back.

The latest version of FTR Gold enables courts to simultaneously record, monitor, and stream audio and video of proceedings live from any courtroom to anywhere on the court network—to remote court monitors, digital court reporters and authorized participants within the courthouse or across the town, county, or state.

To support the ongoing need to include remote participation in proceedings, the new, advanced features in FTR Gold 7.7 enhance live listening and confidence monitoring by enabling configurability within the live streaming functionality.

Courts can choose how they want to stream court content—including audio only or video included options, plus low or high-definition streaming quality.

With reduced networking overhead and stuttering and caching issues, users can monitor with confidence, even in slower wide area network (WAN) environments.

As always, FTR Gold's video capabilities continue to set the industry benchmark, with four channels of HD video from a range of non-IP cameras (such as webcams and USB cameras).

Multiple AV features significantly improve the quality, capacity, and accessibility of both audio and video, with enhanced recording and playback of up to 16 channels of high-fidelity audio.

The new FTR Gold release is consistent with our drive to help courts, law enforcement, and government agencies meet compliance, while also evolving into their digital futures.

Choose Your Suite.

FTR Recording Suite.

Capture and manage the court record with this on-premises suite of software tools for each courtroom. With high-fidelity audio and HD video recording, easy annotation, and advanced storage and access, it has everything you need to record with confidence.

Inclusions:

- ✓ FTR Reporter
- ✓ FTR Manager
- ✓ FTR Player
- ✓ FTR Reporter Server

FTR Monitoring Suite.

Centrally monitor and remotely record proceedings in multiple courtrooms or courthouses. Users can remotely start and stop recordings, monitor audio activity, play back content from specific venues, and annotate while listening to recordings.

Inclusions:

- ✓ FTR Monitor
- ✓ FTR Manager
- ✓ FTR Player
- ✓ FTR Reporter Server

FTR Annotation Suite.

Efficiently play back, annotate, and manage the digital record. Users create meaningful, searchable log notes critical to an accurate transcript—such as appearances, spellings, and key terminology—and clearly linked to the precise place in the audio and video recording.

Inclusions:

- ✓ FTR Manager
- ✓ FTR Player
- ✓ FTR Log Notes

FTR Interview Suite.

Capture accurate and admissible evidence from interviewees—as part of efficient and fair interview processes—with an integrated audio and video recording solution designed specifically for law enforcement agencies and victim advocacy centers.

Inclusions:

- ✓ FTR Manager
- ✓ FTR Interview Recorder
- ✓ FTR Player
