

Official court content management and ordering—automated and transformed.

FTR Express Access automates and streamlines the previously manual and time-consuming processes associated with locating, managing, ordering, and distributing official court content, including audio/video recordings, certified transcripts, and speech-to-text draft transcripts.

These processes include:

- ✓ Simplified ordering and processing for official court content requests
- ✓ Allocation of transcript requests to transcribers and court reporting firms
- ✓ Transparent status tracking
- ✓ Access to content managed by courts
- ✓ Archival of completed transcripts
- ✓ Secure, online payments

Powered by FTR Justice Cloud, FTR Express Access offers enhanced functionality for justice administration.

Key Features.

- ✓ Easy-to-use interface streamlines the ordering process for official court content
- ✓ Simple upload and delivery process for transcript orders alerts court administration to review, approve, and process payments
- ✓ Jurisdiction-specific metrics provide visibility into volume, monthly/annual revenue, and on-time delivery
- ✓ Automatic bundling instantly delivers recordings and log notes to assigned court reporter or transcriber
- ✓ Transparent cost estimates and secure payment process
- ✓ Comprehensive, automated tracking of transcript production provides real-time status of orders and monitors user access of court recordings
- ✓ Streamlines communications between courts, transcribers, and ordering parties
- ✓ Ability to integrate with court managed vendors, including internal transcript providers, external providers, or a combination of both

For The Record Cloud Ecosystem.
