

# Portable legal recording solutions: real-time transcription wherever you need it.

The FTR RealTime Go Recorder is a portable recording solution, ideal for legal professionals who need a reliable and agile tool to capture records of legal proceedings on the go.

This convenient audio kit leverages FTR RealTime, enabling high-fidelity audio recording and speech-to-text technology to be deployed where it's needed most.

### Inclusions:

- ✓ FTR Justice Cloud license with auto-renewal
- ✓ Touchscreen laptop
- ✓ Multi-channel audio mixer with USB interface
- ✓ Up to eight 18" gooseneck microphones
- ✓ Custom case

### Key use cases include:

- ✓ **On-the-go legal proceedings:** Offers high-quality recording and real-time transcription for depositions, off-site hearings, or temporary courtroom setups
- ✓ **Mobile arbitration or mediation:** Facilitates accurate and immediate record-keeping for non-courtroom legal processes
- ✓ **Backup for permanent setups:** Acts as a versatile fallback for fixed courtroom technology failures
- ✓ **Addressing resource constraints:** Records proceedings when stenographer services are unavailable
- ✓ **Assistive technology:** Provides an on-demand accessibility option for people who are deaf or hard of hearing, or for those who require additional comprehension support

## Key Benefits.

- ✓ **Portability plus minimal configuration:** Compact and easy to set up within minutes, with pre-configured software and hardware
- ✓ **Real-time transcription:** Enhances productivity by enabling immediate access to comprehensive draft transcripts, unlike manual note-taking or standard recording devices
- ✓ **Cost efficiency:** Provides a significantly more cost-effective solution than permanently installed courtroom audio equipment
- ✓ **Accessibility:** The usability of audio recordings increases with search functionality and the option to review content at your preferred pace
- ✓ **Secure storage and access:** Automatically replicates audio and speech-to-text records to the cloud for secure storage and retrieval
- ✓ **Local recording capability:** During internet connectivity or network issues, recordings are temporarily stored on the laptop and automatically uploaded to FTR Justice Cloud once the issues are resolved
- ✓ **Identifies speakers:** Offers up to eight audio channels, configurable with custom labels for speaker attributed text
- ✓ **Collaboration and annotation:** Multiple users can access and annotate speech-to-text feeds simultaneously
