

Unrivaled storage, security, and access for official court content.

Forming the foundation of FTR Justice Cloud, FTR Recording Vault exponentially increases the ease and security of managing official court content.

It provides automatic, secure, cloud-based storage and a comprehensive, centralized management platform. FTR Recording Vault enables simplified access to official court content from any internet-enabled device, anytime.

FTR Recording Vault automatically replicates digital court recordings to the cloud as they are captured.

The platform guards court records with industry-leading security measures, yet still makes them instantly available to judges, court staff, and other approved participants.

Powered by FTR Justice Cloud, FTR Recording Vault is enhanced functionality for justice administration.

Key Features.

- ✓ All recording files (FTR Gold V1.1 to the latest generation 4-channel HD video and 16-channel audio; plus files captured by a RealTime recorder) are automatically stored and managed centrally via automatic cloud replication
- ✓ Courts can manage user permissions and access
- ✓ Save on local data storage costs with enhanced scalability and flexibility
- ✓ Reinforce disaster recovery processes and reduce the risk to locally stored files with cloud-based storage
- ✓ Comprehensive auditing capabilities to monitor usage and retrieval of recordings: see who accessed records, when, and on which device
- ✓ Security features protect sensitive court data against threats including unauthorized use, hacking, manipulation, or fraud
- ✓ Seal or unseal portions of court records instantly
- ✓ FTR Justice Cloud App supports transcribers and court reporters, facilitating efficient transcription

For The Record Cloud Ecosystem.
