FTR Warehouse 5.7.2.16 - Release Notes

Version(s):	5.7.2
Release Date:	15-Nov-22
Target audience:	All customers using Warehouse Server 5.7.2
Components affected:	FTR Warehouse Server
OS supported:	• Windows Server 2008 R2 • Windows Server 2012 R2
Build	http://ftr-products.s3.amazonaws.com/FTR%20Warehouse/FTR%20Warehouse%205.7.2%20Build%209.zip
Patch	https://ftr-products.s3-ap-southeast-2.amazonaws.com/FTR+Warehouse/FTR+Warehouse+5.7.2+Patch+16.zip

Summary

This patch release of FTR Warehouse Server includes the following bug fixes

New Changes:

- Addresses the issue that .0.trm files cause synchronization failure
- Addresses the issue that the same log sheet occurs multiple times in search result
- Adds FIPS support

Earlier Changes:

- Addresses the memory leak issue impacting the synchronization process
- Addresses the issue with verifying signed files
- Addresses the issue where the DNS lookup was performed on each known replication source when an API request was made to Warehouse. This process increased in time with each new replication resource causing delayed processing in large deployments.
- Addresses the issue with the duplication functionality
- Address the issue where sealed recordings were not recognized on FTR Player and Manager

Important Note

- For server 2008 - Enable .NET 3.5 and desktop experience, Install .NET 4.5
- For server 2012 - Enable .NET 3.5 and media foundation
- Install 5.7.2.9 full installer before installing this patch
