

The gold standard in on-premises court recording, monitoring, management, and play back.

FTR Gold ensures accurate, continuous capture of courtroom proceedings. Our multichannel audio and video recording software empowers judges, clerks, court administrators, and court reporters with complete confidence that the record is secure, authentic, and accessible.

With FTR Gold Version 7.7, courts can simultaneously record, monitor, and stream proceedings live from any courtroom to anywhere on the court network, supporting remote monitors, digital court reporters, and authorized participants across the courthouse, town, county, or state.

As an on-premises solution, it integrates seamlessly with microphones, cameras, control systems, recording indicators (including clocks), and case management systems, creating a unified recording ecosystem.

Court rely on FTR Gold to:

- ✓ **Capture crystal-clear audio and video:**
Record up to 16 high-fidelity audio channels and four HD video channels
- ✓ **Live stream with control:**
Stream audio or audio and video with rapid start-up and seamless play via FTR Monitor
- ✓ **Monitor with confidence:**
Optimized performance minimizes stuttering and caching for reliable live monitoring—even over Wide Area Networks (WAN).
- ✓ **Annotate and manage efficiently:**
Use an intuitive interface to review, seal / unseal, convert, and export recordings

Choose Your Suite.
